

# Router Lift with Brake, JRL-912

## Product Images

---

## Description

---

Our premium router lift kit with brake offers several features for an accurate and efficient routing experience. The sturdy four-post, chain driven design offers smooth operation for the lifting mechanism. Above the table, one turn of the dials raises and lowers the lift up to 2mm at

a time. The convenient lock dial ensures the lift will stay in position no matter the load on the tool. The precision milled aluminum carriage bracket and leveling screws guarantee and accurate and easily adjustable routing experience.
